Revolutionary Technology in Weapon Care

Handguns, Rifles, Shotguns, Machine Guns, Black Powder, Grenade Launchers & More!

High performance and accuracy are crucial to serious shooters. M-Pro 7 Products offer the most advanced technology for weapon care today. Every time a weapon is fired, it is fouled with carbon, lead, copper or plastic. The carbon residue embeds itself deep into the pores of the bore metal and acts like a glue, attracting more fouling. Continuous firing layers more carbon, lead, and copper fouling on the surface of the bore. The M-Pro 7 system was scientifically designed with these vital things in mind – clean the weapon down to the pores, condition the bore to repel additional fouling, and then provide a powerful lubricant, protectant, and optional field cleaner for intermittent cleaning under harsh conditions.

Pictured is a cylinder face of a Smith & Wesson .357 Magnum revolver cleaned multiple times with several popular gun cleaning brands.

The remaining visual carbon "staining" is the same Embedded Carbon in the bore that acts as a bond for Surface Carbon and Metal Fouling

This side was then cleaned with M-Pro 7 Cleaner.

The complete M-Pro 7 System is designed to condition a firearm so subsequent cleaning time and effort is reduced by up to 80%

M-Pro7 Products

- Perfect for gunsmiths
- Less expensive to use
- Maintain weapons in less than half the time
- Approved as safe by all major gun makers
- Improve accuracy and overall mechanical performance
- Exceed EPA and MIL-SPEC requirements
- Surpass all other gun maintenance products

M-Pro 7 Gun Cleaner is safe for the entire gun, conditions the bore, removes lead and copper, is perfect for ultrasonic and dipping tanks, doesn't have a bad odor and is non-toxic.

eguns.com is a part of Pengar Enterprises, Inc. Please call or fax 888 534 9585 or visit www.eguns.com to purchase M-Pro 7 System products at a good discounted price. M-Pro 7 System products include the gun cleaner, a thicker bore gel, ultimate gun lubrication (gun oil), and advanced CLP (Cleaner Lubricant Protectant) for field use..

M-Pro 7 Gun Cleaner

Originally developed to clean weapons on the multi-million dollar F-16 for the US Air Force, M-Pro 7 Gun Cleaner's special blend of chelating agents, corrosion inhibitors and surfactants in a non-toxic solvent base safely penetrates into the pores of the metal. A firearm treated with M-Pro 7 is cleaner than when it shipped from the factory. In addition, M-Pro 7 Gun Cleaner is safe to use on all handguns, rifles, shotguns, machine guns, grenade launchers, and more.

Available in a 4oz and 8oz pump, a 32oz trigger sprayer, and in one gallon bottles.

M-Pro7 Bore Cleaning Gel

This product offers all of the benefits of M-Pro 7 Gun Cleaner in an easy to use gel form. Many gun owners find spray cleaners too messy to use for small bore rifles and handguns. M-Pro 7 Bore Gel offers a cleaning alternative to the traditional spray, with the same strength and performance.

Available in 4oz and 8oz bottles, and by special order, in gallon size

M-Pro 7 Military Grade CLP (Cleaner Lubricant Protectant)

When used in conjunction with M-Pro 7 Gun Cleaner for deep cleaning and metal conditioning, M-Pro 7 Military Grade CLP provides field cleaning along with superior lubrication and corrosion protection. A step above M-Pro 7 Gun Oil, this advanced oil uses a synthetic film coat technology. Rated at -55°F to 800+°F, it surpasses MIL-L-63640 and is non-toxic, biodegradable and non-flammable with low odor.

Available in 1oz, 4oz squeeze bottles, and 32oz bottle with trigger sprayer.

M-Pro 7 Ultimate Gun Lubrication (Gun Oil)

M-Pro 7 Gun Oil keeps dirt and contaminants away from moving parts creating much less friction and significantly reducing wear. M-Pro 7 Gun Oil is significantly slicker than Teflon® based products. Rated at -40°F to 650°F, M-Pro 7 Gun Oil exceeds expectations. It is also non-toxic, non-flammable, and biodegradable with no odor.

Available in 1oz, 2oz, and 4oz squeeze bottles.

M-Pro 7 Gun Cleaner Challenge

Take a gun that you know is absolutely clean. Clean it again with one of your favorite cleaning solvents. Then spray one squirt of M-Pro 7 Gun Cleaner down the bore, wait one minute, run a bore brush through the bore once, and then a dry patch. If you are not shocked by what comes out of the bore, call 800-937-4677 for a full refund including shipping both ways

If it doesn't smell, how can it work?

M-Pro 7 Products contain unique chemical technologies involving state-of-the-art aerospace solvents, surfactants and other components. Clean your gun as many times as you want with your old trusted smelly gun cleaner and then clean the bore with M-Pro 7 Gun Cleaner. The patch will come out dark gray or black every time (see M-Pro 7 Challenge). M-Pro 7 Gun Cleaner is removing carbon that has been in the bore since the first test fire.
